UMB Campus Guidance for COVID-19 Return to Campus

- The UMB Return to Campus Guide provides campus-wide information related to practices and precautions. This School of Pharmacy Facilities FAQ will be periodically updated to align with campus guidance.

Cleaning and Trash

- **Classrooms and Public Areas with Seating**
  Environmental Services (EVS) sanitizes common touch areas such as doorknobs, railings, and elevator buttons two times per day. Disinfectant wipes are supplied at classroom entrances for students to wipe down their individual seat area before class. Furniture has been set up to allow for the appropriate physical distancing and should not be moved by faculty, staff, and students.

- **Point-of-Use Cleaning Carts**
  Blue cleaning carts are located adjacent to common areas (lounges, kitchens, bridges, lecture halls and classrooms) and are stocked with a pump bottle containing disinfectant solution for your hands, as well as disinfectant solution and paper towels for you to clean your tables before and after use. The carts should remain where they are centrally located.

- **Eco-Friendly Disinfectant Wipes (COVID-cidal)**
  There are disinfectant wipe dispensers outside the lecture halls, the classrooms, the kitchens, the study areas, and the lounge areas. Use the wipes to sanitize your work surfaces before and after use.

- **Restrooms**
  EVS cleans sinks and toilets and restocks paper products in restrooms twice daily. Wipes are available to open doors and turn faucet handles.
• **Door Handles and Elevator Buttons**
  Wipes are available to open doors and press elevator buttons and should be discarded in a trash container after use.

• **Office Trash Cans (individual offices and common office space)**
  Full office trash cans should be placed in the hallway outside the office door. EVS will pick up trash after 2 p.m.

• **Blue Recycling Baskets (individual offices and common office space)**
  Faculty and staff are responsible for routinely emptying their recycling into the appropriate recycling containers. Paper can be discarded in the large blue wastebaskets near copiers. Clean glass, metal, and plastic can be recycled at recycling stations located on each floor.

**Refrigerators and Microwaves**

Wipes are available in common seating areas and kitchens and can be used to open refrigerator and microwave doors and to turn faucet handles on and off. Individuals are responsible for cleaning up after themselves (wiping spills out of sinks, off counters, and out of microwaves, etc.) and are encouraged to wipe down a space before they use it. EVS does not clean refrigerators or microwaves.

**Copy Machines**

Wipes are available near copy machines. Individuals are encouraged to disinfect the buttons before and after use.
