ACADEMIC AND PRACTICE PROGRAMS EXCELLENT MARYLAND

ENTERING THE RACE TO BRING BIOPHARMACTICALS TO MARKET

In 2013, the School of Pharmacy received a small group of students to enter the race to bring biopharmaceuticals to market. This was accomplished in a collaborative effort among the School and industry partners, with the goal of actively engaging students in real-world activities and strengthening the School’s role in the development of new biopharmaceuticals. This initiative was a significant step forward in the School’s efforts to develop new innovative methods in the broad areas of pharmaceutical, clinical, and translational sciences.

ENCOURAGING PHARMAPRENEURSHIP, SHARP MINDS STYLE

The School of Pharmacy is committed to encouraging entrepreneurship and innovation among students and alumni. We believe that fostering a culture of entrepreneurship is essential to the success of new ventures in the pharmaceutical and biotechnology sectors. The School has developed a variety of resources and opportunities to support students and alumni in their entrepreneurial endeavors, including the establishment of the Pharmapreneurship Pathway.

PHARMAPRENEURSHIP® PATHWAY

The Pharmapreneurship Pathway is designed for students who are interested in entrepreneurship and innovation in the pharmaceutical and biotechnology sectors. This pathway provides students with the opportunity to develop skills in entrepreneurship, innovation, and creativity while gaining practical experience in the pharmaceutical industry. The Pathway includes specialized courses, internships, and potential individualized counseling about career options.

The Pharmapreneurship Pathway is designed for a select group of students, with the goal of developing innovative methods in the broad areas of pharmaceutical, clinical, and translational sciences. This initiative was a significant step forward in the School’s efforts to develop new innovative methods in the broad areas of pharmaceutical, clinical, and translational sciences.

Moving forward, the School is emphasizing the concept of Pharmapreneurship®, which the School’s faculty and staff have been working on for many years. The School’s goal is to provide students with the tools and resources they need to succeed in this field. We believe that by fostering a culture of entrepreneurship, we can help students develop the skills and knowledge they need to pursue their goals in the pharmaceutical and biotechnology sectors.

The University of Maryland School of Pharmacy is the fourth oldest school of pharmacy in the United States. The School was founded in 1824 and is one of the oldest and most prestigious institutions of its kind in the country. The School has a long history of excellence in research, teaching, and service to society. The School is committed to providing students with a world-class education and training in the pharmaceutical sciences, clinical/translational sciences, and health outcomes research.

The School is located in the heart of one of the nation’s most vibrant and diverse urban centers, providing students with the opportunity to work with leading scientists and researchers in a highly collaborative environment. The School has a strong record of success in research and has received millions of dollars in funding from a variety of sources, including government agencies, foundations, and private industry.

The School is committed to providing students with a world-class education and training in the pharmaceutical sciences, clinical/translational sciences, and health outcomes research. The School is dedicated to preparing students for successful careers in the pharmaceutical and biotechnology sectors, and we believe that by fostering a culture of entrepreneurship, we can help students develop the skills and knowledge they need to succeed in this field.
Research

The School is expanding its master’s degree offerings, with a particular emphasis on medical cannabis policy. Projects to enhance interprofessional education initiatives on campus and practice, working with our partners at the schools of dentistry, law, and social work.

The Lamy Center is a first-of-its-kind center dedicated to improving drug therapy for older adults, producing new scientific knowledge, and improving the health outcomes of the elderly. The Lamy Center is an interdisciplinary center that brings together researchers from the Department of Pharmaceutical Health Services Research and the University of Maryland School of Pharmacy.

The Lamy Center is supported by the Pharmaceutical Research and Manufacturers of America (PhRMA) Foundation to lead the Research and Quality, engages people from local communities to answer questions about the research and quality of health care providers, and improve health equity and patient outcomes.

The community pharmacist has always been one of the most accessible health care providers and improves health equity and patient outcomes. The Lamy Center is working to enhance the quality of care for older adults by providing education and training to pharmacists, nurses, and other health care professionals.

The Lamy Center is supported by a $30 million grant from the PhRMA Foundation to support the Research and Quality, engages people from local communities to answer questions about the research and quality of health care providers, and improve health equity and patient outcomes.

The Lamy Center is working to enhance the quality of care for older adults by providing education and training to pharmacists, nurses, and other health care professionals.
