Navigate back to the "Home" tab and continue adding your slides.

The video slide should be the first slide in your deck.

When you run your slideshow, the first screen will be blank until you click on the screen, at which time, the video will start to play.

Once the video has finished playing, press the right-arrow key to advance to your first slide and begin your presentation.

Slideshow content starts here

• Here's where you begin your presentation as usual.

If you would like to add the video intro to an existing slideshow, simply add a new blank slide at the beginning of the presentation, and follow the same steps to embed the video file.
