Project: Qualitative Investigation of Telemedicine and Sleep Disorder Treatments

Collaborators: Walter Reed National Military Medical Center; Walter Reed Army Institute of Research; Fort Belvoir Community Hospital; and University of Maryland, Baltimore

Our project abstract, “Active Duty Members’ Opinions and Recommendations for a New Tele-Sleep Management Platform in the United States Military Treatment Facilities”, will be a poster presentation at the Academy Health 2020 Annual Research Meeting. Our team member Dr. Moaz Abdelwadoud will present this poster in the meeting session “Digital Technologies, Data, and Analytics” on Monday, June 15th in Boston, MA.

After the focus group discussions with patients and the providers interviews, Hillary Edwards finished the healthcare administrators interviews on March 19th. These interviews will help give information on the new tele-sleep platform from economic and administrative points of view.
