FAST FACT: In 2013, the percent of young adults using marijuana surpassed their risk perception of marijuana use.

Although only 15% of Maryland young adults aged 18-25 perceived marijuana use was risky, 20% had used in the past 30 days and 34% used at least once in the past year. Young adults smoke more marijuana than any other age group.

Data source: National Survey on Drug Use and Health, 2003-2013
